<b>Subject:</b>	Results of the <b>content review</b> of the paper:
-----------------	--

Please make following slight modifications on your article as required by the content review committee:

	conclusion is almost a repeating of abstract		application area has to be substantiated
	importance of research question (give a more detailed description of current relevance)		methods used & strategy unclear (appropriate methodology, instrumentation, samples)
	objectives have to be appropriate and clearly stated		results not clear (aspects discussed do not fit in result statements)
	stronger delimitation of solution and results required		data validation: data used in the article must be valid
	refine statement of the research problem (feasibility, clearly stated, significance, relationships investigated)		references out of research area/literature review (value of knowledge, generalized sources, primary sources, problem relationship)
	divide authors work from third party work (existing work has to be adequately described and properly referenced)		delineation of strength and weaknesses of methodology/experimental/statistical approach/interpretation of results
	themes have to deal with the topics related to the call of paper		originality of work (deal with issues that have lasting value)
	ethical concerns (remove slandering specific persons or organizations)		remove commercial advertisement for business
